

BRAIN FREEZE

INSTRUCTIONS ON HOW TO PLAY

Start by placing the pink dolphins in the first 3 circles and the blue dolphins on the last 3 circles.

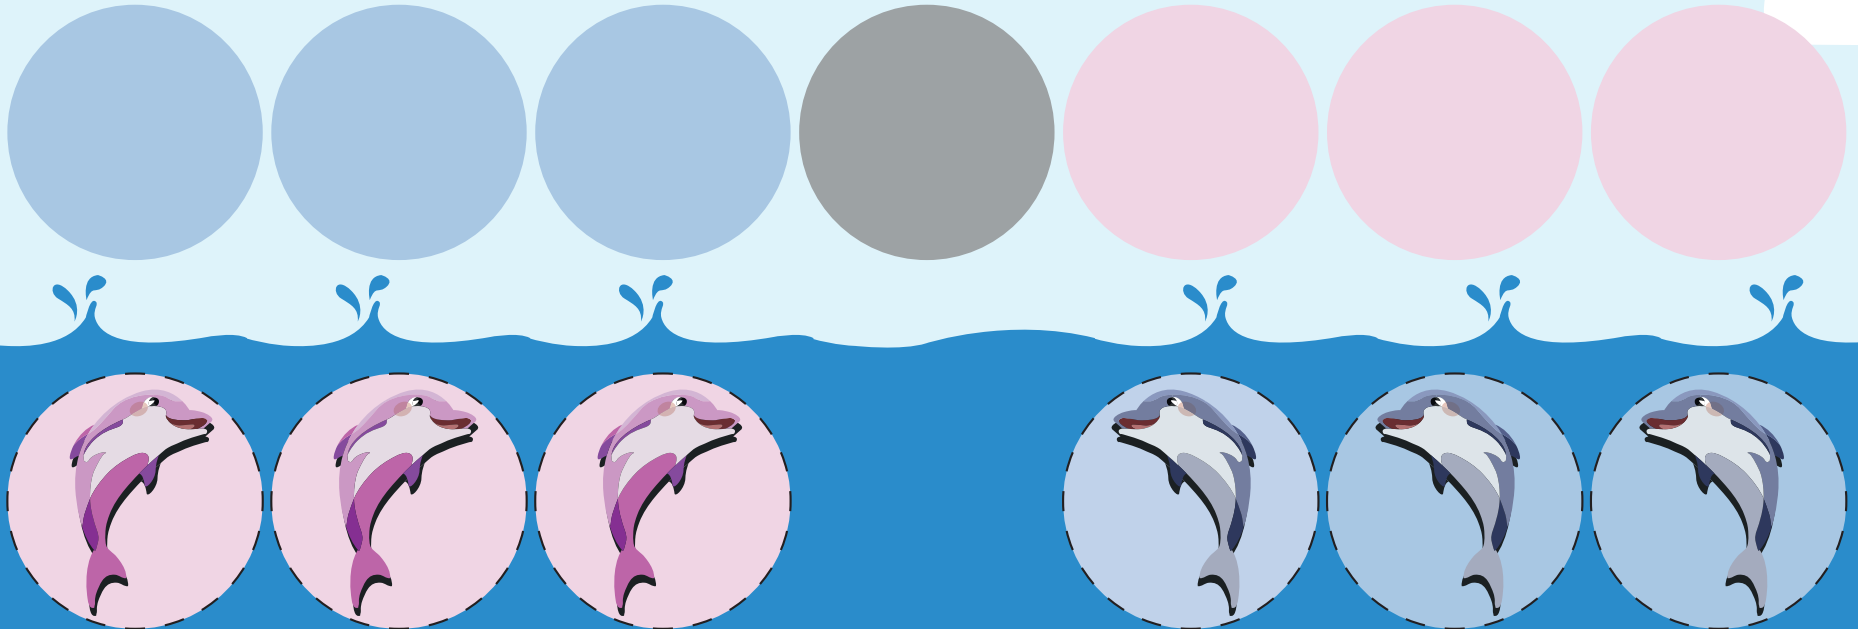

Both groups of dolphins have to switch places, so the pink dolphins end up in the pink circles and the blue dolphins in the blue circles.

The pink dolphins can only move right and the blue dolphins can only move left.

You may only move one space or jump over one dolphin at a time.

ABOUT DOLPHINS

- * Dolphins belong to a family called **Cetaceans** (seh-tay-she-yuns).
- * They like to eat squid and fish.
- * The largest dolphin is the **killer whale**.
- * Dolphins use **echolocation** to find objects in the water.
- * Dolphins are **intelligent** and can learn to perform tricks.
- * Dolphins travel around in small family units called "pods".
